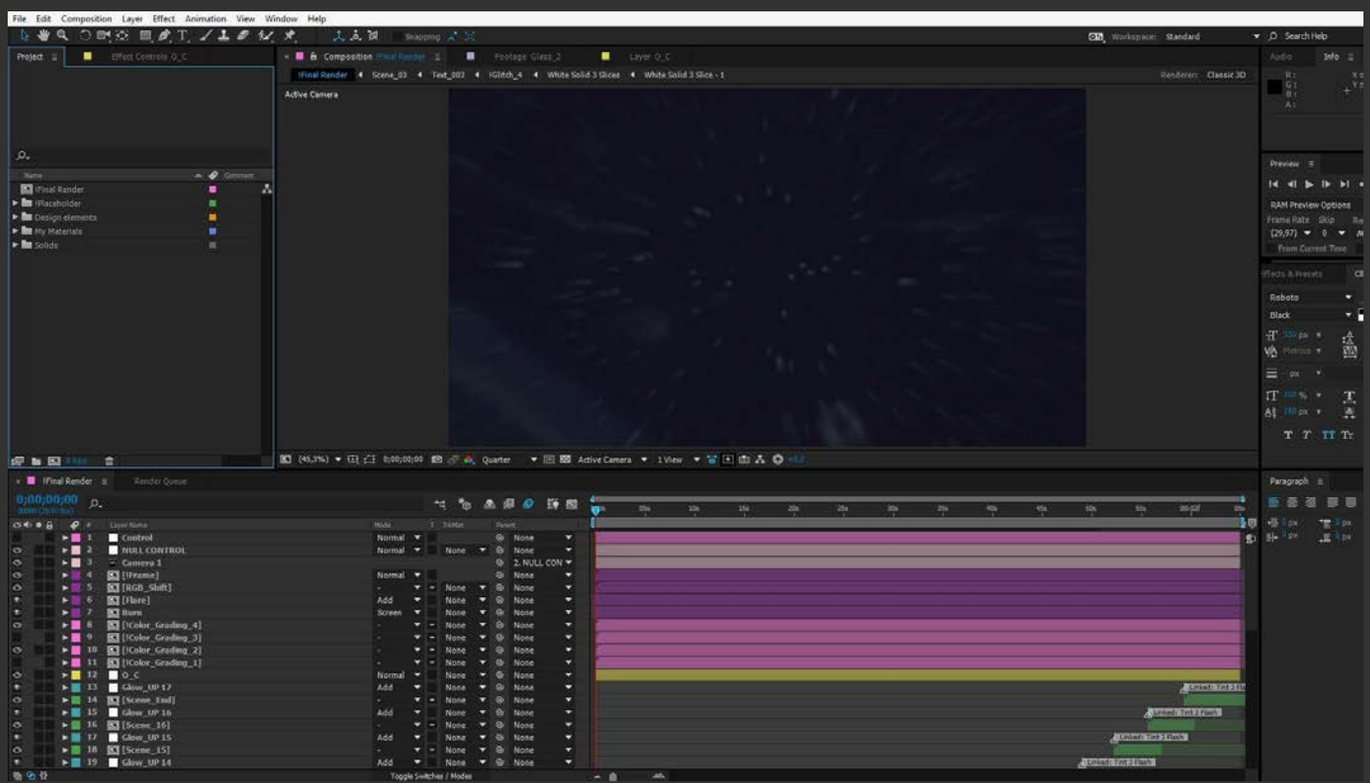
’Slideshow’ Help File

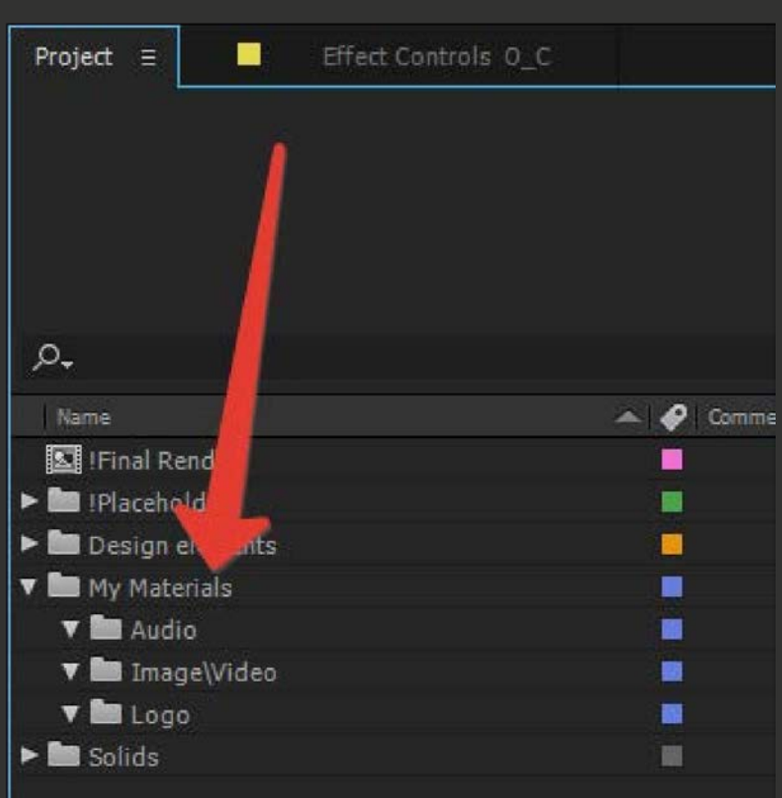
CS 5.5 and above
Full HD 1920 x 1080; 60 fps

videohive.net/user/Zargones

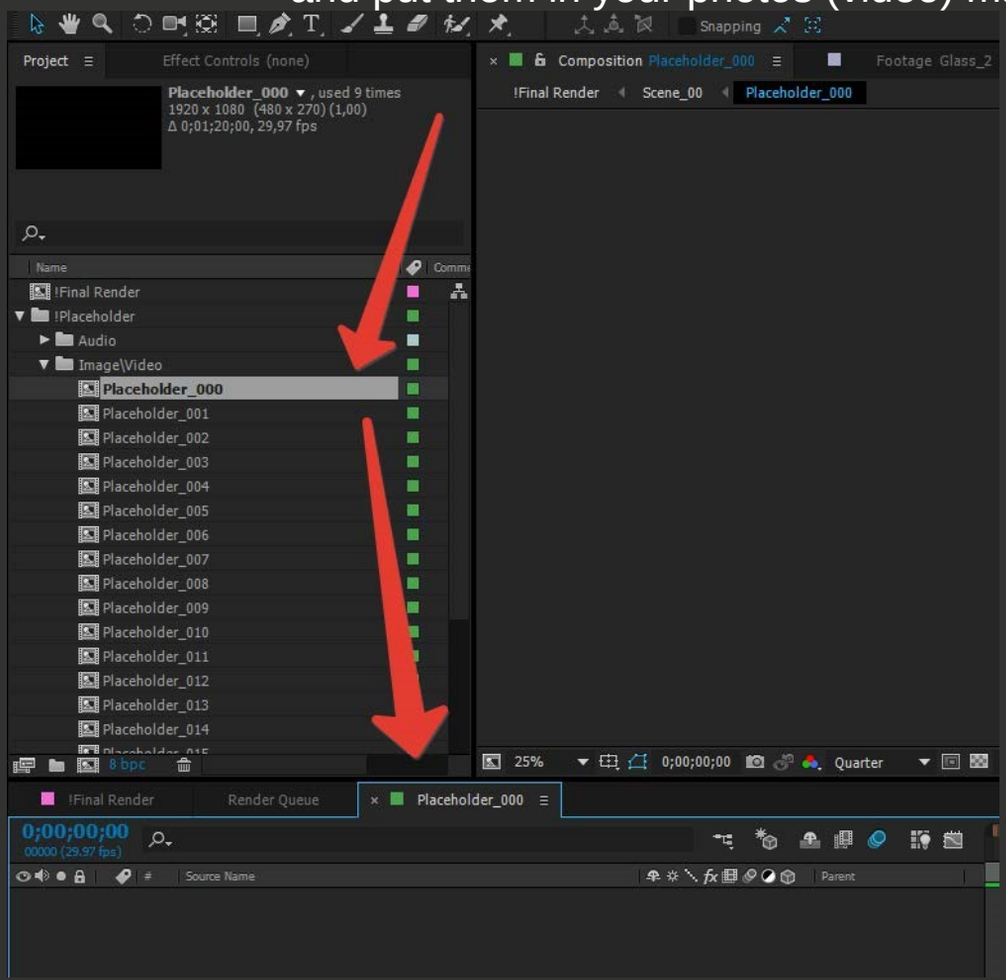
Open project



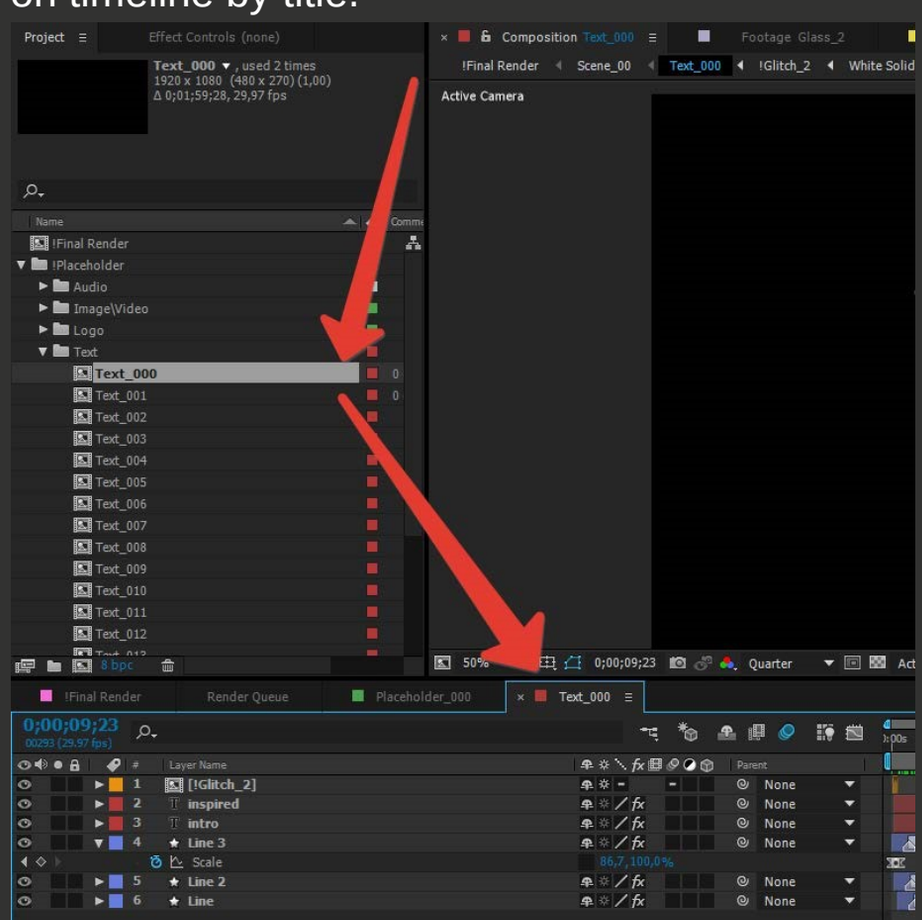
Import your photo (video) and music. For convenience, put them in “My materials” folder.



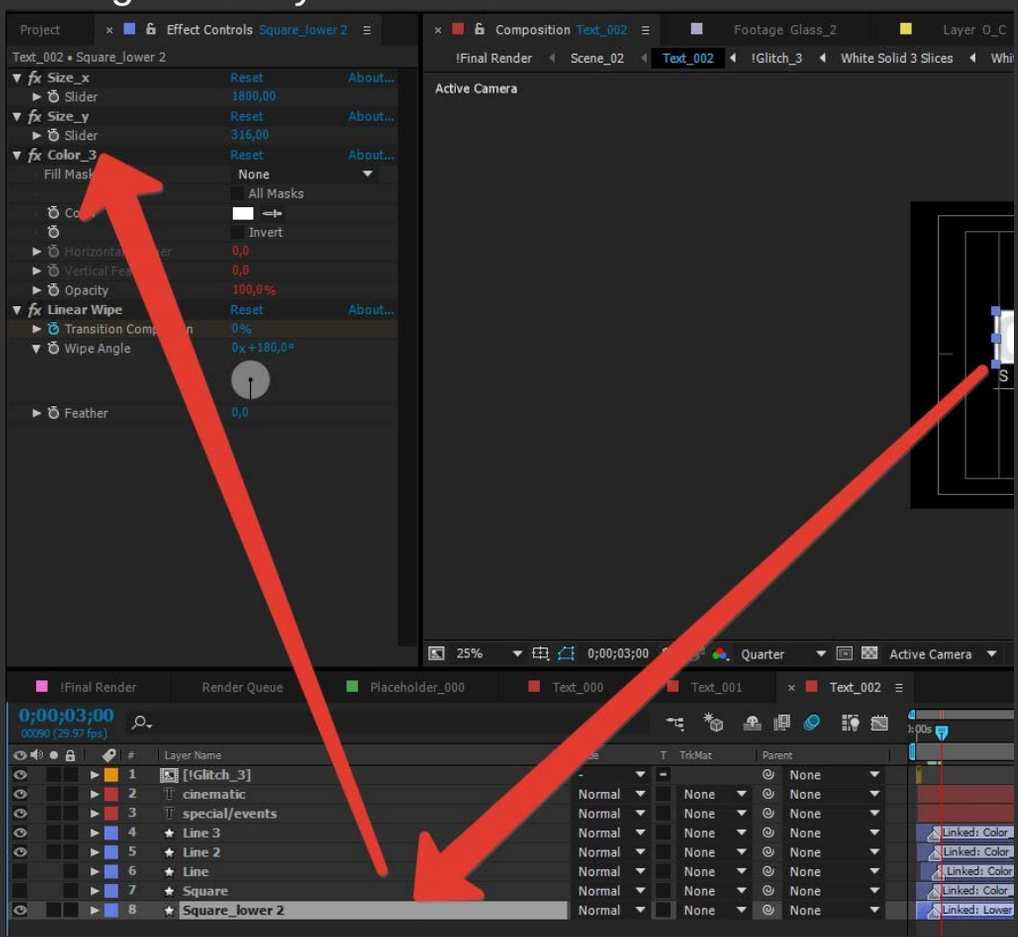
Open “!Placeholder” folder. Open “!Placeholder_#” (!Logo) compositions and and put them in your photos (video) materials



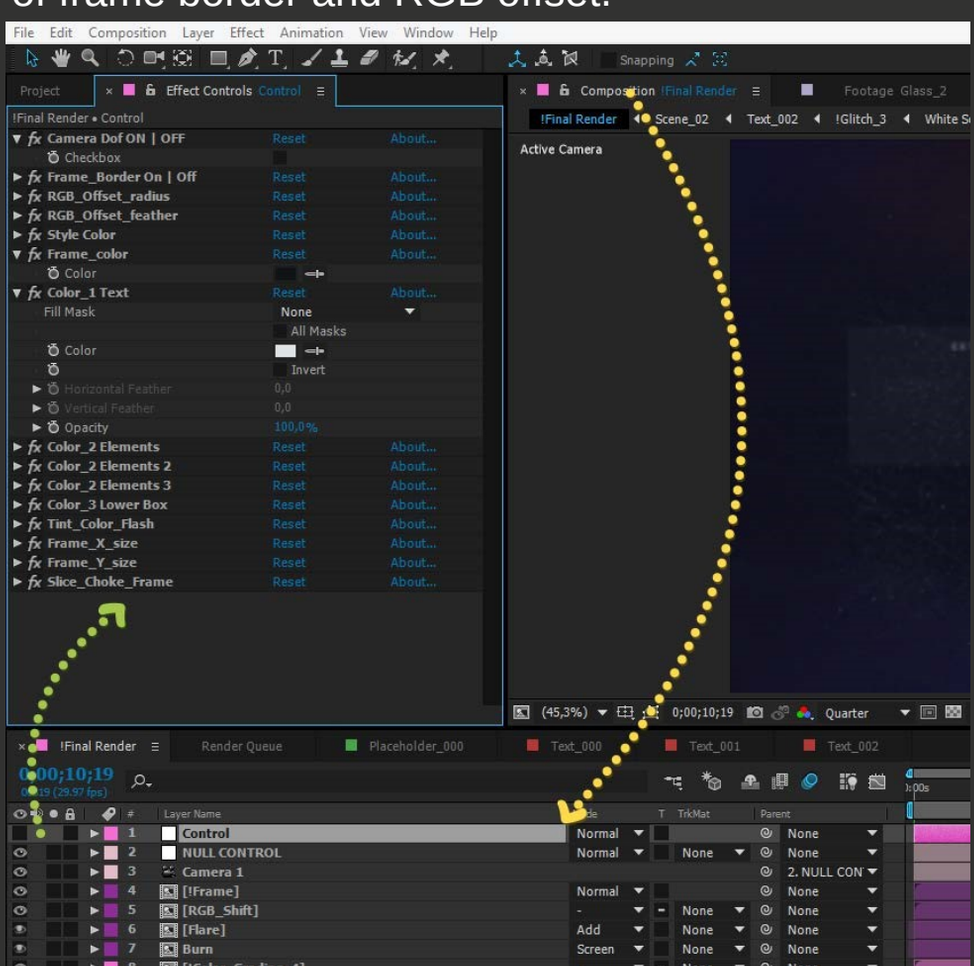
Open “Text” folder. Open “!Text_#” compositions, change text . Search on timeline by title.

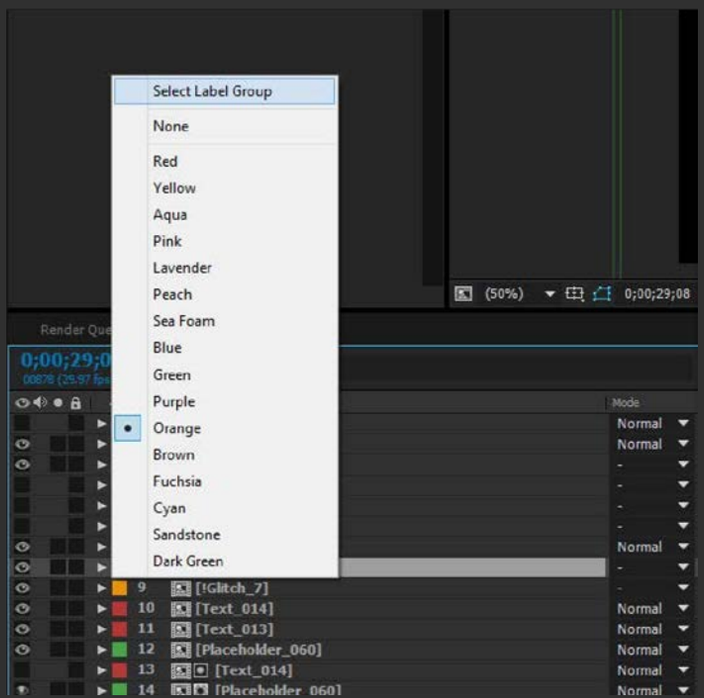


Change to suit your needs lower thirds.



You can turn on or off the frame with a layer of Control. Which is in the composition !Final Render. Change the color of the text box, the size of frame border and RGB offset.



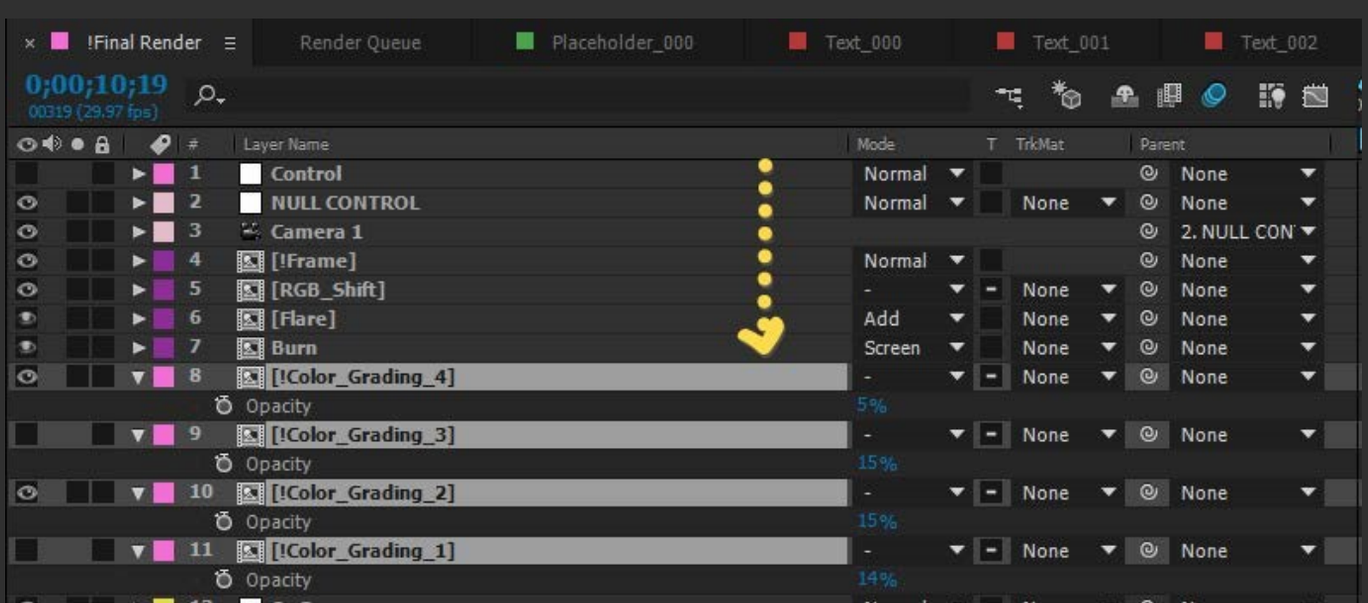


You can enable or disable certain elements, such as text, glitches or tile. Select the appropriate color of the label in the drop-down menu and hide or turn on it.
If you have difficulty with this, here is the link for help from Adobe:
https://helpx.adobe.com/after-effects/using/layers.html#layer_switches_and_columns_in_the_timeline_panel

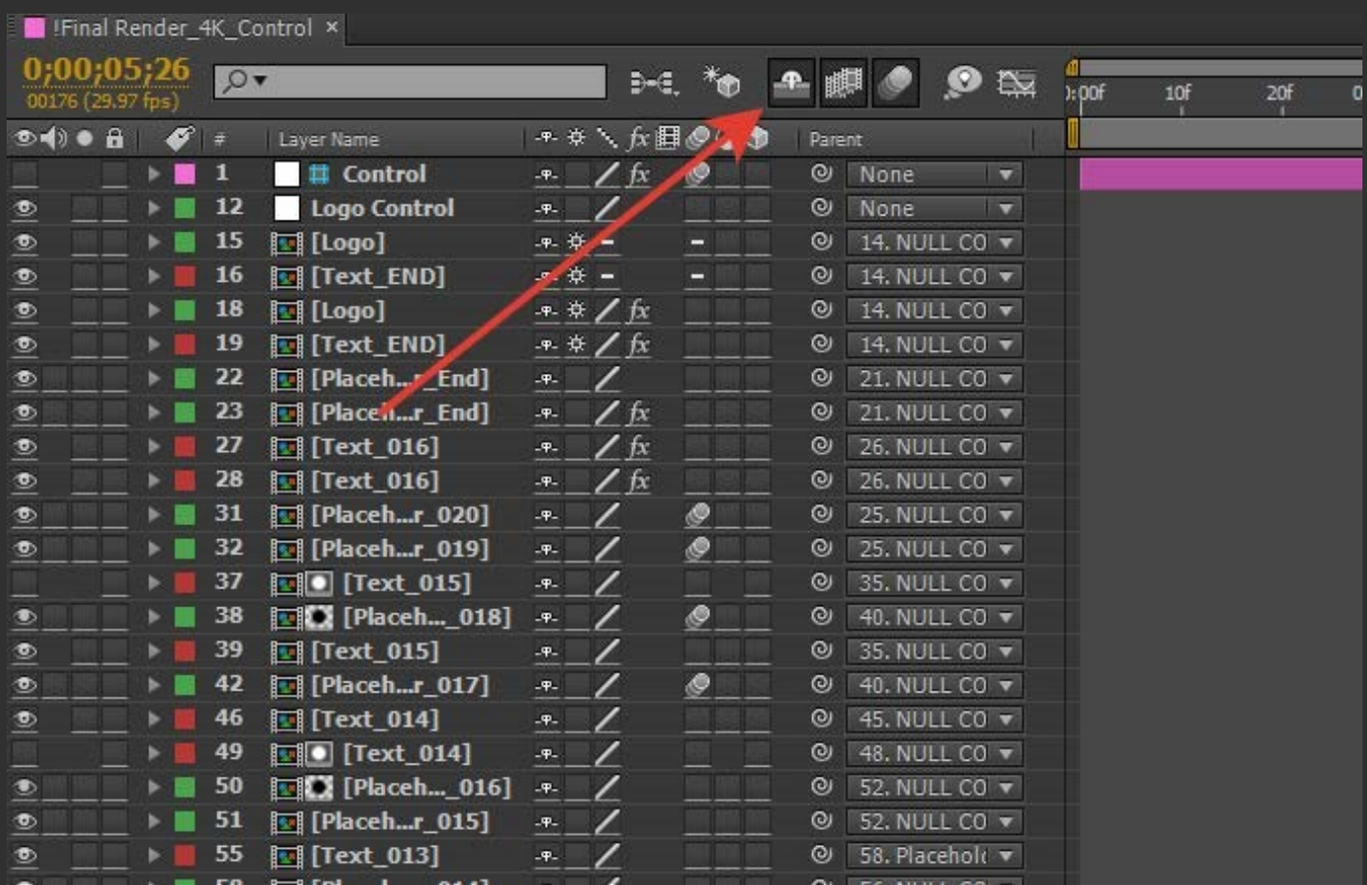
red - text

yellow - design elements
green - placeholder
purple - style
fuchsia - color grading

Use this Color Grading. Select the desired style, make it visible and adjust its opacity ('T' hot key on the layer)



For a good sync animation and music - buy and use music from the project description. And throw it in the 10100839_emotional-inspiring-piano-strings_by_e-soundtrax_preview composition

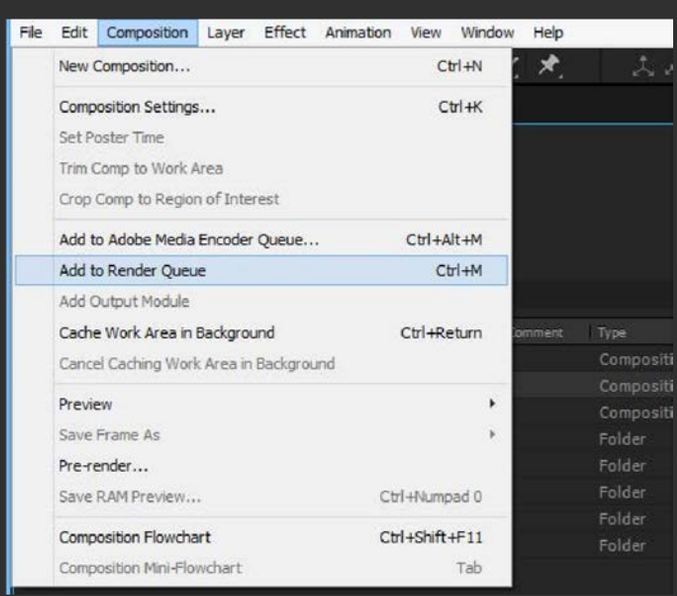


TO SEE ALL LAYERS FOR ADDITIONAL SETTINGS, PRESS THIS BUTTON.

Render the "!Final_render" composition

to render

Or watch tutorial - http://www.youtube.com/watch?v=Lq6cmEaHmbQ



THANKS FOR BUYING!
